Haystack—It is no longer a matter

of speculation, when we say the harvest

will be large and abundant. From every

part of the country we are receiving

news of the progress of the grain now being

gathered, which shows that the good hand

of Providence has been opened for our

liberal supply. No further doubts need be

apprehended for food for the year to come.

We had persuaded ourselves that the vast

extent of our country, the diversity of our

soils, and the variety of our production

would secure us against famine—but we

were convinced of our mistake last year.

It is not only the wheat, but the corn, the

potatoes, the fruit, the stock, the wool,

the oil, the sugar, the tobacco, the iron,

the lead, the zinc, the copper, the tin,

the silver, the gold, the platinum, the

mercury, the arsenic, the antimony, the

nickel, the cobalt, the manganese, the

chromium, the vanadium, the niobium,

the tantalum, the tungsten, the molybdenum,

the selenium, the tellurium, the bismuth,

the strontium, the barium, the calcium,

the magnesium, the potassium, the sodium,

the lithium, the rubidium, the cesium,

the francium, the actinium, the thorium,

the uranium, the plutonium, the americium,

the curium, the berkelium, the californium,

the einsteinium, the fermium, the mendelevium,

the nobelium, the lawrencium, the rutherfordium,

the dubnium, the seaborgium, the bohrium,

the hassium, the meitnerium, the darmstadtium,

the roentgenium, the copernicium, the flerovium,

the livermorium, the tennessine, the oganesson,

the unbinoidium, the unquadrium, the unseptium,

the unhexium, the unquadium, the untrium,
