HIGH COST OF LIVING.

A New Plan Offered the Public of this City.

It is a matter of great interest to the people of this city to know that through the efforts of the American Business Men's Association, a plan has been formulated and put into operation that will materially reduce household and living expenses. This does not come Bara complete surprise, but is the result, off the united efforts of an organization numbering about 15,000 dealers in every part of the country.

By means of this movement all the merchants of this city will be enabled to buy their goods for less money, and through the methods advanced by the above Association, the entire advertising and selling expense of manufacturers is being eliminated. The entire savings thus obtained will be given to the consumers.

eliminated. The entire savings thus obtained will be given to the consumers.

In addition to the retailers being able to make more profit, and thereby give the consumers staple brands of merchandise for less money, several special inducements will be made to the consumers that should secure the co-operation and support of every citizen of this county.

For instance, a Redeeming Station for the American Business Men's Association which will be located in the Ralston Hardware and Implement Store, will have on exhibition a handsome, new 1915 Model Automobile Touring Car. One of these cars will be shipped to this city and given away to some consumer through a method that will be agreed upon by the merchants of this city who are members of the American Business Men's Association. The saving of feeted through the concentrated selling of the Manufacturers, and the co-operative buving of the dealers, will not only enable them to give one of these fine Automobiles away, Absolutely Free, in this city every six months, but will also enable Mr. Ralaton to offer \$5.00 worth of merchandise free, each and every week, to the consumers buying products of the Manufacturers who are affiliated with the American Business Men's Association.

Live, progressive merchan's in all parts of the country are memoers of

with the American Business Men's Association.

Live, progressive merchan's in all parts of the country are memors of the American Business Men's Association, for they realize thoroughly the many benefits that accrue through co-operation, and the presenting to the consumers, only goods that are made by reliable Manufacturers, and that have a national reputation behind them.

A long list of Manufacturers numbering 150, who produce some of the best known brands of merchandise will be published complete in the the next week's issue of this paper. The slogan, "American Goods for Good Americans" will be illustrated in such a manner that it will really surprise every one who is actually interested in the savings that will be made possible, in household and living expenses.

surprise every one wno is actuany interested in the savings that will be made possible, in household and living expenses.

The Sales plan that will be put in to operation in this city within a week or ten days, is somewhat novel—for instance, every time you go to your grocer, druggist, butcher, candy man, cigar man or any other merchant in this city, who is ca-operating with these Manufacturers you will be given a Manufacturers Special Coupon, for every Five Cents (5c) worth that you may spend for the products of these Manufacturers Five of these coupons may be exchanged at the store of Mr. Ralston for one Automobile ticket. To the holder of the largest number of Automobile tickets every week, Mr. Ralston will give \$5.00 in merchandise out of his store Absolutely Free of charge. Yet, you do not have to surrender these automobile tickets, but can hold them for six months as they will at the end of that period participate in the awarding of the Automobile,

In presenting this unique method of modern merchandising, which is actually taking the country by storm, the American Business Men's Association asks for the unqualified support they rightfully deserve, because you will not only obtain meritorious merchandise, but will actually help to build up the business of our home city, instead of sending the money out of town, to help maintain the prestige of the large mail order concerns in distant cities.

Pneumonia Season

The pneumonia season has arrived Not because the weather is colder. Arctic explorers do not get pneumonia until they return to "civilization." Not because of raw winds from the lake, though these chill the body and thereby reduce resistance to the disease. "Fneumonia comes at this season because 'wepole close doors and windows to keep 'ot' cold air, and thereby condemn themselves our breather the foul air in which the deadly pneumococcus rejoices and multiplies. Keep your houses and offices as warm as you like. Americans are accustomed to warm rooms, and it would be foolish to take a sudden change. But see that the place where you live and work has plenty of fresh air. A closed window shuts sickness in, not out.

Corn and Oats as Peed for Work The pneumonia season has arrived

Corn and Oats as Feed for Work Horses.

A comparison of the value of oats and corn as feed for work horses is reported in Ohio Agricultural Experiment Station Bulletin No. 195. The popular opinion that oats make much better feed than does corn is not substantiated by the data presented in the above mentioned bulletin. In fact, the data seems to show that the exclusive use of ear corn as the grain feed for work horses for eight weeks was not detrimental to the health of the horses, that corn does not induce laziness or lack of endurance; on the other hand oats did not increase the endurance or the spirit of the horser pound for pound corn has in years past been the cheaper feed.

Rome, Nov. 23.—Przemysi has offered to capitulate on condition—that the garrison march out with arms and baggage. The Russians refused to accept the offer because they believe the fortress cannot hold out much longer. Surrender is imminent.

Because of the important bearing on the war in general and the great number of men engaged interest centers on the battles in Poland.

General von Hindenburg, commander of the German troope, and Grand Duke Nicholas, commander in chief of the Russians, two of the greatest strategists the war has produced, are maneuvering for positions between the Vistula and the Warfa and a big battle is in progress on the Cracov-Caentochowa line between Russian and Austro-German forces.

Germans Sunk the Audacious.

New York, Nov. 24.—The British superdreadnaught Audacious was sunk
by a torpedo discharged from a German submarine. This news was reccived at Washington from an authoritaring source in Reelin and the details ccived at Washington from an authori-tative source in Berlin and the details given fit closely with the reports that came from eyewitnesses who saw the disaster from the steamship Olympic. The Audaclous was hit twice, and the second torpedo caused its magazines to explode. This story refutes the suggestion that the battleship was blown up by its own crew "to prevent it becoming a menace to navigation" as was stated after the disaster.

Infantry Attacks Are Directed by Teuton: but All Are Repulsed.

Paris, Franco.—The end of the battle of the Yser is in sight. The Genmans during the past three days are reported in information from the north of Financer ato have brought up 86,000 men and more than 200 guns for a final effort to cut through the allies' line before winter shall have set in, bringing to a period extensive operations on this front.

A small army of German sappers, under convoy of strong detachments of German infantry, supported by a number of machine guns, Monday were reported to be moving on Blischoots, evidently for the purpose of attempting to put a stop to further inundations of the German lines of entrenchments by a last desperate effort to repair the dykes. Heavy artilery fire covered the sappers' advance. The French artillery reply was exceedingly vigorous and, according to unofficial reports, the engagement at this point is fast developing into a battle of the big guns for the possession of the dykes.

ENGLISH PATROL BOAT RAMS AND DESCTROYS TEUTON SUBMARINE U-18.

London, Engiand.—Britain's navy scored one against the Germans Monday when a patrol ship rammed and ank the submarine U-18 off the north coast of Scotland. The little prowler, whose presence near the coast was reported by scouts early in the morning, had been the object of scarch through the morning. It was shortly after noon that the patrol ship, which the admiralty's announcement leaves unidentified, came upon the submarine and ran her down. At once the U-18 went down and the patrol ship, knowing she had struck a hard blow, called to others of her squadron and organized a further search. In just an hour after the impact the submarine came to the surface displaying the white flag of surrander.

In response to the signal, the British torpedo toat destroyer Garry hurried alongside the U-18 and began taking off her crew, for it was evident that the little boat was in distress. In a few minutes three officers and 25 men of the crew went over the Garry's ide as prisoners. Then the U-18 and sent jurched and sank, carrying down with her one salton. The patrolling squadron waited in hope that he might seeage, or at least that his body might rise to the surface, but after an hour or more the vessele scattered to their posts. DECLARES BARONS DOMINATE POLITICS

Says Men and Women Were Thrown Into Prison Without Any Charge Being Lodged Against Thom.

New York City.—In a report to the commission on the church and social service of the Federal Council of the Churches of Christ in America, Just made public here, Rev. Henry A. Atkinson, associate secretary, as investigator, arraigns the Colorado coal companies for their attitude in the recent labor troubles in that state. Rev. Mr. Atkinson was served to Colorado and also to the copper mining districts of Michigan, where there were recent industrial difficulties, by the social service commission of the Coursegational churches and the commission of the council of the council of churches and empowered to represent both bodies in his investigation into labor conditions.

in his investigation into labor condi-tions.

After reviewing the trouble in Col-orade his report says:

"The coal companies dominate the politics in those counties where the mines are located. They have brought about the election of judges, sheriffs, coroners and assessors. They can do about as they please so far as the law is concerned. A mass of evidence was brought out to show that they control the political, social and economic situ-ation.

Says Companies Rule.

'Jefferton Fast, shorth of liverfano county, has been in office for 15 years. He is known as the king of Huerfano county. What he says goed—as one of his admirers put it to me. It is not what he says, but what the coal companies say. These companies have hought about his election as well as that of other officers and they control them.

and the courts are practically closed to those who in any way incur the emilty of the coal companies, thus economic justice is denied the men through the manipulation of political affairs. Thirty years of such oppression, industrial, social and political, have taught the miners that their only hope is in the unions.

"An individual counts for nothing; if he protests he losse his job; if he makes too much trouble he is dealt with by hired gunmen, who are kept at the mines to do the will of the companies and help enforce the law against the workers."

Of the actions of the militia, Rev. Atkinson informed the commission as follows:

Also Control Militia.

"The soldiers were gladly received by the strikers, for they expected they would have some protection, but their hopes were in vain. It soon became evident that the militia was under the countrol of the coal companies.

"Men and women were thrown into all without any charge being lodged against them and held incommunicado.

"The concitution of the native was net aside. The militis met and excure justice, was used to break excited a trike breakers who were broated strike breakers who were reprought into the state. The militia, instead of adming to maintain order and secure justice, was used to break the, strike. Special attack was made upon the Ludlow colony, it being the largest in the district.

"There were 900 people living there, 272 of them children, 21 having been born during the winter. There were 11 nationalities, and yet they lived in peace. It was this colony against which the militia, including the mine guards, directed their fire on April 20. A number of the inhabitants were killed and the tents were destroyed by fire.

"In the investigation following the Luddow kattle it was shown that many

killed and the tents was beautiful.

"In the investigation following the Ludiow battle it was shown that many of the militia who were receiving pay from the state were at the same time in the employ of the coal companies as guards, thus they were receiving double pay. They were really employes of the companies fighting in the name of the state."

Other Devastations.

Every year, according to actentists who attempt to keep the seneral records, at least \$5,000,000 human beings are born on this earth and \$0,000,000 or 70,000,000 det. This indicates a daily hirth rate of about \$20,000 and a feet at the of 180,000. The daily increase in population therefore is about \$4,000. The totaly increase in population of the globe is estimated at 1,500,000,00. The traveges of war do little to impede the increase. Far more effective have been the upheavelts of nature. The Franco-Prussian war killed about \$10,000. As along the estimated to have caused \$300,000 deaths. The fartalities of the Messina earthquake in 1930 calmot have been far short of 100,000. A tidal wave in 1386 drowned 77,000 persons in Japan, causing a greater loss of life than the whole war with China in 1834. The earth-quake in Japan in 1703 is said to have killed 200,000 people. The Lisbon earthquake in 1755 destroyed 50,000 human lives, while 40,000 were lost in the same year in earthquake in Persia.

One of the perplexing problems encountered by conches of the various "yarsity" racing shell crews, that of providing better means for winter training than is offered by the ordinary rowing machine, has been met satisfactory at Syracuse university through the installation of an indoor rowing tank, provided with mechanical means for simulating the passage of the boat through the water. This provides whal might almost be called actual rowing, besides keeping the men in condition.—Popular Mechanics, Magazine.

One result of the European War has been to reduce the volume of business done by many of the manufacturing institutions of the United States, commercial enterprises have been affected, business of many kinds have been the manufacture of many kinds have been hampered, and a financial stringency has been forced on almost springency has been forced on almost springency has been forced on almost springency has been these things about and created a lot of hardship, but there is the outstanding fact of the terrible loss of life, the great destruction of property, and the disruption of everything near and dear to those whose countries are involved in struction of property, and any care at the of everything near and dear to those whose countries are involved in the war that makes the whole affair highly regretable. The heart of the antire world goes out in sympathy to flose within the area of the trouble. Arrangements have been made to relieve the distress by money and other means. But there is one great thing —wheat shad flour—that the European countries will need. The wheat-producing countries are no longer producing, and there is the gravest reason to fear that they will not be for some years, in this case, it would be fully as beneficial and charitable to make provision to meet the loss of Europe's grain crop by encouraging a greatly increased growth on this continent.

The wheat-growing sections of the United States have about reached their limit of production, and this source cannot be depended upon to meet a great deal of the demand that there will be for some years. The only country that is in a position to meet it is — Canada — that portion known as Western Canada. Here there are millions of acres of land, capable of producing from 20 to 40 busbels per acre. All this land is excellent for wheat, and very much is still in the hands of the Dominion Government, and 160 acres of it can be had by the payment of a ten dollar entry fee.

held at from \$10 to \$25 per acre. Improved farms are alightly higher in price. Information regarding these lands may be had of any Canadian Government Agent.

The fact that Canada offers such a splendid opportunity should be accepted with a wide-spread appreciation, and not met with attempts on the part of some to spread misleading statements. The Dominion Government has not taken steps to deny many of the false statement circulated, by those who evidently are more interested in injuring Canada than benefiting those who would be benefited by taking up farms in Canada, but in order to correct a highly eroneous impression that conscription is carried on in Canada, that compulsory military service is employed, and that there is restraint as to the movement of those not Canadians, the necessity is felt of giving as much publicity as possible to a denial of these statements.

With hunting in Ohio brought to an almost complete suspension by reason of the state sgricultural commission's quarantine order to stamp out the hoof and mouth disease, the agricultural commission made an amendment to its order which lifts the ban against one class of shooting held by the fish and game department not to be dangerous to the purposes of the quarantine. The amendment, altering Section's of the general quarantine order, grants permission to hunters to shoot ducks from boats on tenspass on private property. It is held that such hunting in no way can be dangerous as a means of spreading the hoof and mouth diseases, so Gen. John C. Life Payments.

The first permanent total disability case under Section 27 of the workmen's compensation law, to be heard by the industrial commission of Ohio, was that of William H. Shell, of Neel Jeys, O. The injury in this case was caused by the explosion of a stick of dynamite which the injured man was attempting to light. The injuries consisted of the loss of slight of both eyes and the loss of the left hand at the wrist. The employer in this case find not compiled with the law, which compels employers of five or more to pay their proper premium into the state insurance fund, nor had he secured permission to carry his own insurance. For that reason Mr. Shell applied for compensation under the provisions of Section 27 of the law, and the industrial commission ordered R. M. Conner, the employer of Mr. Shell, to pay him \$12 per week, beginning May 20, 1914, and to continue to the date of his death. Medical expenses in the sum of \$200 were also ordered paid.

With the increased use of bichloride of mercury as a disinfectant there have resulted numerous cases of sulcidal and sacidental poisoning, the latter being due to mistaking this powerful corrosive poison for medicine in tablet form. For preventing accidental poisoning, various ways of preparing particularly for preventing accidental poisoning, various ways of preparing the poison so that it will readily be distinguished from any other substance has been proposed, but the solution of the whole problem now scems to have been found in the plan of mixing a powerful emetic with the bichloride of mercury. This is a tartar emetic so compounded that it will exert its full emetic action before the corrosive sublimate can begin its action, causing violent nausea until 'he stomach is entirely emptied. It is stated that the disinfecting power of the bichloride of mercury is in no way impaired by mixing the emetic with it.

The hoof and mouth disease was discovered Tuesday afternoon by Drs. Smith and Franks, federal and state inspectors, among a herd of 35 cattle belonging to Bloom Buck of Shelby. The cattle are being pastured on the Hutchinson farm about four miles south of Plymouth in Plymouth township. They were appraised and then slaughtered in conformity to the law, Thursday.

Farmers are claiming that the closed hunting season, preventing the killing of rabbits, is going to work a great loss to them the next year. The rabbit crop, the present year, is larger than for a long time, and farmers already see difficulty in protecting their young orchards, gardens and some of their farm crops next year, from the great army of bunnies if the ban against hunting is not raised shortly.

The prospects for a county fair in Huron county never looked better than they do right now, says the Norwalk Reflector. F. M. Lutts, who was sent down to Columbus by the chamber of commerce to confer with President Sandles of the state agricultural commission, has returned home full of enthusiasm. He will be ready to make his report to the chamber of commerce next week, and has plans that Mr. Sandles himself evolved, how to start and conduct a fair in this county.

A king's ransom was spent by the wet and dry forces in conducting the fight for and sgrainst the home rule and prohibition amendments. The two state organizations, the Ohio Home Rule Association and the Anti-Saloon League, spent a total of of \$422,000. If all the money spent by local organizations in the counties amount to this it is probable the total would approximate \$1,000,000. It is estimated that the republican and democratic state committees repent a total of over \$100,000 in the campaign for candidates. If the amounts spent by local organizations were added to this the total would far exceed \$1,000,000.

Gentlemen: Right advertising is good news. Whoever hands out a rightly edited circular does well, but to print it in a newspaper is better, because thousands more will read it.

I know how to write the copy intended to bring a large volume of trade from all classes. You will have a busy store if you publish what I write each week. Every busy business man needs an advertising writer. Publishers like good copy.

You can begin now, and quit any time. I am now writing for some of the largest houses in Ohio; pleasing my patrons for over thirty years. Write for my very liberal terms to noe in each line. A sample ad. for any legitimate business, 50 cents. No two ads alike. Truly,

Try This for Your Cough.

Thousands of people keep coughing because unable to get the right remedy. Coughs are caused by inflammation of throat and bronchial tubes. What you need is to soothe this inflammation. Take Dr. King's New Discovery, it penetrates the delicate mucous lining, raises the phlegm and quickly relieves the congested membranes. Get a 50c bottle from your druggist, "Dr. King's New Discovery quickly and completely stopped my cough," writes J. R. Watts, Floydale, Texas. Money back if not astished, but it nearly always helps.

Aged People

THE BANE of old age is constipation. The bowels become weak and unable to perform their functions without aid. For this purpose only the mildest and gentlest laxative should be used. The use of harsh cathartics aggravates the trouble and makes the constipation worse. Chamberlain's Tablets are a favorite with people of middle age and older on account of their gentle action.

Now is a good time to look over and see what will be helpful to Plymouth the coming year, and then plan to put all practical things in operation. Plymouth, so far as public inprovements are concerned, is far ahead of many towns much larger in population, but we can't afford to quit at this. We must be up and doing all the time, and it is the little things sometimes that are the most helpful and most appreciated. For instances a public reat room with tollet attached for ladies would be one of the little things much appreciated.

The union Thanksgiving services at the Lutheran church Thursday morning were attended by a fair representation from each of the three congregations, with a large union choir. Reves Manifold, Mott and Crafts were in attendance. The sermon was delivered by Rev Manifold, who spoke in eloquent terms of the necessity of acknowledging the blessings received from the Master during the year, and the greater gifts to be expected from a spirit of "saying so" when such are received. Rev. Mott read the se iptural lesson in a very creditable way and a prayer filled with valuable Thanksaviving suggestions was made by Rev. Crafts.

"Them's rurales," he said at last, "and heading straight for us—but we've come too far to get caught how. Come ou!" he added brusily, and want galloping up the swale.

For two miles they rode up the wash, their heads below the level of the plain, but as Bud emerged at the mouth of the guide and looked warily over the cut bank he suddenly reached for his rife and measured the distance to the line.

"Well" he said, slowly detaching Gracia's fingers and putting her hand away.

As Phil ran forward to greet them he stepped sullenly off to one side. What they said he did not know, for his mind was suddenly a blank; but when Phil rushed over and wrung his hand he came back to earth with a start.

"Bud!" cried De Lancey ecstatically, "how can I over thank you enough! You brought her back to me, didn't you, old man? Thank God you're safe—I've been watching for you with glasses ever since I heard you had started! I knew you would do it, pardner; you're the best friend a man over had! Butt—say, come over here a minute—I want to speak to yok."

He led Hooker off to one side, while Gracia watched them with jealous cyes, and lowered his voice as he spoke.

"It was swful good of you, Bud," he whispered, "but I'm afraid you've got phad! The whole town is crazy about it. Old Aragon came up on the first train, and now they've wired that you killed Del Rey. By Jove, Bud, wann't train, and now they've wired that you killed Del Rey. By Jove, Bud, wann't that pulling it a little strong." Capisian of the rurales, you know—the whole dexican government is behind him—and Aragon wants you for kidnaphig!"

"What's that!" demanded Gracia, as she heard her own name spoken.

"But there's the immigration office," interposed Phil pacifically, "You will have to go there—and your father has claimed you were kidnaped!"

"Ha! Kidnaped!" jaughed Gracia, who had suddenly recovered her abetts. "And by whom?"

"But I will not go!" fung back Gracia.

"Ob, my dear girl" cried De Lancey, frowing in his perplenty, "you don't understand, and you make it awful hard for me. You know they're very strict now—so many low women coming across the line, for—well, the fact is, unless you are married you can't come in at all!"

"But I'm in!" protested Gracia flushing holy. "I'm—"

Been Located Seventy Miles
From Portland.

Springs hot enough to cook beans
and boil eggs in three minutes have
been found within a short distance of
Portland, Ore. They are on the Clackamas river, 30 miles south of Estacada and 70 miles from Portland.
These springs are 50 in number,

them.

The springs are supposed to be the

Siegs of Kimberiey.

During the Boer war Mr. Rhodes was shut up in Kimberiey, and the Boers constantly shelled the town with long-range artillery. They were not very successful, for with 300 big shells they only killed 12 people.

Meantime, Mr. Rhodes accomplished the extraordinary feat of getting a cannon built at his works inside the town. It was a regular modern rifled gun, and fired shells—also homemade—on each of which was stamped, with compliments of C. J. Rhodes."

The Boers themselves were not without a sense of humor. During Christmas, 1839, they were bealeging Ladysmith, and on Christmas ever they fired ten plugged shells into the town, cach with a piece of plum pudding in-lide, and each bearing the words, "With the season's compliments."

Two of the shells were found by the garrison, and it was discovered that, like Mr. Rhodes', they were homemade, having been cast in a foundry at Johannesburg.

Blue and dark green veils are exclusive modes.

Filet meshes are the leading style projectora. Meshes an inch square are advanced and are decorated with black velvet squares as an added distinction. These are placed far apart, and when worn with a low-crowned flat sallor are most enchanting.

Nose veils, those most adorable meshes introduced during the summer for wear with small hats, are being continued in vogue. Those which offer an inch wide woven border, as well as those which show velvet and chenille dotted patterns in border effects, are popular.

The mask veil, improperly named the harem veil, is made with an allover design arranged to cover the face, leaving the ends of the veil in plain, unadorned mesh.

Lace valls are not in vogue. The dotted, squared or oblong velvet-made spots posed on very widely spaced meshes are being greedily taken. As for chiffon veils, one hardly sees them. The yards of veiling which formerly were considered quite modish to be wound and festooned around one's hat in billowing waves of I'ue, brown, green or black, are not accepted styles.

A new idea in this respect is to have the coat a contrasting color to the skirt.

For instance, an ultra-smart model had a quite plain black velvet skirt of a comfortable walking length, the coat being cerise, bordered with black for. The hat that accompanied this had a certain suggestion of military form in its outline and was carried out in black velvet with a doublure of cerise, the brim sottened with black for.

Another original and attractive idea is the eton coat, from which falls a deep basque, which is neatly plaited, although it must be confessed that it is more often slightly draped. As a matter of fact the basque extend to the hem of the skirts and have the appearance of a tunic. These coats are very economical, as they can be worn with a great variety of skirts. Again, their aspect can be metamorphosed by waistoosts; of this accessory a special feature is being made.

Furthermore, the sash occupies a process of the contractive manner of the skirts and have the special feature is being made.

Our Early Chinese Trade.

The rapid growth of our early trade with China is shown by the fact that the 37 ressels carrying in 1856 nearly five and three-quariers millions' worth of goods to Canton, represented a larger fraction of our total foreign commerce than our trade with the whole of China does today. The silver imported to balance American trade with China averaged more than two and a half millions annually in the 30 years down to 1827, and reached a maximum or seven and a half millions in 1818.—John Ford, in Youths Companion.

There is no overseer quite so cruel as that of unrestrained greed, no whip that stings like the lash of suborned destiny, and no auctioneer's block quite so revolting as that of unrestrained greed, no whip that stings like the lash of suborned destiny, and no auctioneer's block quite so revolting as that of unrestrained green the season of the property so, for suggesting mediation between the engineers and railroad managers in adjusting their schedule of time and pay. The engineers threatened to strike if their wares were not increased from approximately ten to eleven dollars per day and service reduced from ten to eight hours and a similar readjustment of the overtime schedule. Our women are working in the field, many of them barefooted, for less than 50 cents per day, and their schedule is the rising sun and the evening star, and after the day's work is over the milk the cown, slop the hogs and rock the baby to sleep. Is anyone mediating over their problems, and to whom shall they threaten a strike?

Congress has listened approvingly to those who toil at the forge and behind the counter, and many of our statesmen have smiled at the threats among industrial laborers. But women a

unnecessarily increased, society foots the bill by drafting a new consignment of women from the home to the field. Pinch no Grumb From Women's Crust of Bread.

No financial award can be made without someone footing the bill, and we commend to those who accept the responsibility of the distribution of industrial justice, the still small voice of the woman in the field as she pleads for mercy, and we beg that they ginch no crumb from her crust of bread or put another patch upon her ragged garments.

for mercy, and we beg that they ginch no crumb from her crust of bread or put another patch upon her ragged garments.

We beg that they listen to the scream of horror from the eagle on every American dollar that is wrung from the brow of tolling women and hear the Goddess of Justice hiss at a verdict that increases the want of woman to satisfy the greed of man. The women behind the counter and in the factory cry aloud for sympathy and the press thunders out in their defense and the pulpit pleads for mercy, but how about the woman in the field? Will not these powerful exponents of human rights turn their talent, energies and influence to her relief? Will the Goddess of Liberty enthroned at Washinston hold the calloused hand and soothe the feverlab brow of her sex who sows and reaps the nation's harvest or will she permit the male of the species to show women—weak and weary—from the bread-line of industry to the back alleys of poverty?

Women and Children First.

The census enumerators tell us that of the 1,514,000 women who work in the fields as farm hands 409,000 are sixteen years of age and under. What is the final deathny of a nation whose future mothers spend their girlhood days behind the plow, pitching hay and hauling manure, and what is to become of womanly culture and refinement that grace the home, charm society and enthuse man to leap to glory in noble achievements if our daughters are raised in the society of the ox and the companionship of the plow?

In that strata between the ages of sixteen and forty-five are 950,000 women working as farm hands and mass of them with suckling bases tagsing at their hands and mass of them the her heads, as deen ched in perspiration, they wield the scyths—and guide the plow. What is to become of that mation where poverig

despair as their sching hearts take it all to God in prayer. Civilization strikes them a blow when it should give them a crown, and their only riend is he who broke bread with beiggars and said; "Come unto me all ye that are weary and heavy laden and I will give you rest."

Oh, America! The land of the free and the home of the brave, the world's custodian of chivalry, the champion of human rights and the defender of the oppressed—shall we permit our maidens fair to be torn from the heartstone by the ruthless hand of destiny and chained to the plow? Shall we permit our faithful wives, whom we covenanted with God to cherish and protect, to be hurled from the home to the harvest field, and our mothers dear to be driven from the old arm chair to the cotton patch?

In rescuing our citizens from the tour chair to the cotton patch?

In rescuing our citizens from the tour chair to the cotton patch?

In rescuing our citizens from the tween—women and children frast?

There must be a readjustment of the wage scale of industry so that the women han be taken from the field or given a reasonable wage for her services. Perhaps the issue has never been fairly raised, but the Farmers' Union, with a membership of ten million, puts its organized forces squarely behind the issue and we now enter upon the docket of civilization, the case of "The Woman in the Field" and demand an immediate trial.

RAILROADS APPEAL TO PRESIDENT

The Common Carriers Ask for Relief—President Wilson Directs
Attention of Public to
Their Needs
The continue of railroad executives, headed by Mr. Frank Trumbull, representing thirty-drey of the leading railroad systems of the nation, recently presented to President Wilson a memorandum briefly reviewing the difficulties now confronting the railroads of the country and asking for the conjunction of the governmental authorities and the public in supporting railroad credits and recognizing an emergency which requires that the railroads be given additional revenues. The memorandum recites that the European war has resulted in general depression of business on the American continent and in the dislocation of credits at home and abroad. With revenues decreasing and interest rates increasing the transportation systems of the country face a most serious or the country face a most serious attention when the fames meet is apparent to all. In their general discussion the railroad representation and regulation by the federal government and the forty-eight states acting independently of each other, as well as through the action of a strong public opinion, railroad expenses in recent years have vastly increased. No criticism is here made of the general theory of governmental regulation, but on the other hand, no insentily can, relieve the carriers of expenses created thereby.

The add the memorandum of the railroad presidents to the public, characteries it as "a lucid statement of plain truth." The president recognizing the emergency secundinary

the need very real."

The conference was certainly a fortunate one for the nation and the president is to be congratulated for opening the gate to a new world of effort in which everyone may co-operate.

effort in which everyone may co-operate.

There are many important problems in our complex civilization that will yield to co-operation which will not lend themselves to arbitrary rulings of commissions and financing railroads is one of them. The man with the money is a factor that cannot be eliminated from any business transaction and the public is an interested party that should always be consulted and happly the president has invited all to participate in the solution of our railroad problems.

Rattled the Umpire.
Players tirroughout the American league live under the impression that. Harry Coveleskie, the Tigers southpaw, can be rattled by the persistent whistling, singling or playing of "Silver-Threads Among the Gold."

At different times phis season opposing teams have tight to make the big Pole slip by following up this practice. They have yet to succeed, but hall players are persistent individuals.

New York's Highlanders started the time when Coveleskie was pitching a game at Detroit.

All through the first liming they whistled and sang and stammed their feet in accompaniment. A double play pulled Coveleskie out of a hole in the first period and in the second the Highlanders renewed their efforts.

Through the second inning and into the third they went.

Golf Courses Costly.

There are not many persons outside of those on the inside of the game of golf who fully appreciate what amount of money it requires to establish a golf course along thoroughly up to date lines, nor to what extent a man will delve into his personal fortune for the sake of gratifying his heart's desire in the building of links which will rank among the best in the section. Not long ago 150 Philadelphia golfers were asked to subscribe \$1.000 each that a new course goold be built in the Chekthot Hill section. When the National Golf Links of America was first projected at Shinnecock Hill. N. Y., there were \$1,000 subscriptions obtained in sufficient number to bring about the completion of a course now ranked as the greatest in the world.
