NewLondon Rips Pirates

Norwalk St. Paul (5-1 and 6-1-1) can win the Firelands Conference high school football championship outright tonight with a victory over visiting Monroeville (4-2 and 5-3).

That situation was set up last night when New London (2-5 and 2-7) shocked Black River (5-2 and 7-2), 37-7.

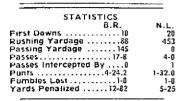

Mapleton (5-2 and 7-2) rattled South Central (0-7 and 2-

SULLIVAN — The Black River Pirates had their "swash buckled" by the New London Wildcats.

New London Running Back Dean Harris stormed the Pirate defenses for 244 vards and three touchdowns,

while running mate Duane Williams powdered the Pirates for 138 yards and two touchdowns.

Harris, who rushed 15 times for a 16-yard average per carry, scored on touchdown runs of 46, two and one and set up two other touchdowns with 52 and 49-vard runs. Williams scored on runs of one and nine yards as he lugged the ball 24 times for an average of five yards per carry.

The other New London touchdown was by Brad Potts-- a five-yard gallop with 1:32 remaining in the

Black River's only touchdown came on a 35-yard pass from Jim Young to Chris Scheck culminating a nineplay, 62-yard drive opening the third quarter to cut the margin to 19-7.

Black River needed a Monroeville victory over Norwalk St. Paul this afternoon to back into a tie for the Firelands crown.

The game's first score came when Williams crashed over from the oneyard line on the last play of the first quarter to cap a 66yard drive in seven plays.

New London scored twice in the second quarter as it built up a 19-0 lead at the

"WE'RE ON THE **ENERGY TEAM!"**

"As an elected official, I'm working to convince the people in my area we'll benefit from oil drilling and a new refinery near here." Drilling operations and refineries in new areas can

help everyone. They'll help increase much-needed domestic energy supplies, bring many refined petroleum products closer to consumers to help

reduce costs, and add to the local economy.

"I'm working to make sure that oil industry exploration and development won't damage

the environment while helping the energy situation." The environmental scientist is an important man in the oil industry today. The industry is going to have to find and produce twice as much oil and gas in the next 15 years as it did in the past 15. It's his job to see that oil companies meet or surpass reasonable environmental standards in the process.

A lot of people are working to solve the energy problem. It's a big job that needs the best efforts of all of us.
