

The background of the entire page is a complex, abstract fractal pattern. It features swirling, organic shapes in shades of deep blue, magenta, and red, set against a dark, almost black, background. The patterns are intricate and self-similar, typical of fractal art.

The Year 2000

Havamal

200

2000 Havamal Plymouth High School

The meaning of the Havamal is the "Song of the high". It is the Norse Code on the conduct of life in a long narrative saga in poetic form which illustrates the Viking rules of life. The great war god, Odin, supposedly stole it. Nobody knows who originally composed it but it has been in existence for many years.

Paul Du Chaillu (the first author) expresses many subjects encountered in every day life such as: a man's happiness, the value of science, and the duty of cheerfulness and bravery. Other ideas warn that wealth is the most unstable of friends, a man is never without his faults, and also cautions man not to neglect his friends.

In 1963, Havamal was chosen as the theme for our yearbook and has remained the title because of its historical significance and its application in modern day living.
